

AMERICAN SCHOOL OF ORIENTAL RESEARCH  
JERUSALEM, PALESTINE

OFFICE OF THE DIRECTOR

CABLE ADDRESS: MONUMENTS

April 5, 1933.

Dear Albright:

I am sending you a small article on Tell el-Hammeh, together with a number of photographs of sherds. By the same post I am sending four plates of plans and drawings of sherds to go with the article. I leave it to your judgment as to where to publish the article, or not to publish it at all, if you do not think that it is worthwhile.

I trust that you received the article and plates on the Transjordan trip, which I sent to you several weeks ago. I wonder if I could impose on your kindness and ask you to make several minor corrections in the manuscript. I am enclosing a list of them. Abbe H. Breuil spent the morning here at the School, examining the Kilwa photographs, and was enthusiastic about the find. I am enclosing a list of his comments on the pictures, which I should like to have added as a postscript to the article on Transjordan. Many thanks.

I have gotten the Jerash expedition started, and we are clearing the south side of the arch. I have engaged another architect, in addition to Detweiler. He is a classmate of his, and has been working with Bache at Tepe Gawra. His name is E. Bartow Mueller. As soon as the Jerash expedition is swinging along, I want to start on the work I wrote to you about in my last letter.

With hearty greetings,

sincerely yours,

MB
